Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the medium containing 100 mg/l of tetracycline and 100 mg/l of kanamycin. The cell concentration of the *Agrobacterium* strains was adjusted to 10<sup>8</sup> cells/ml. The cell suspension was mixed with the plant tissue and incubated for 24 h. The plant tissue was then cultured on the medium containing 100 mg/l of tetracycline and 100 mg/l of kanamycin. The transformation efficiency was determined by the number of transformants per 10<sup>6</sup> cells. The data were expressed as the mean ± SD of three independent experiments.

**Figure 6.** The effect of the number of iterations on the accuracy of the proposed algorithm. The results are averaged over 100 trials.

**Figure 6**

[illegible]

Sequence logo for the 10th position. The y-axis represents information content in bits, ranging from 0 to 0.4. The x-axis shows the four nucleotides: A, C, G, and T. The 'G' position has a prominent peak reaching approximately 0.35 bits, while A, C, and T have much lower values around 0.05 bits.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher for the 10-trial condition than for the 5-trial condition. Error bars represent the standard error of the mean.

## 一、检测说明

受鄱阳县绿色东方再生能源有限公司委托，对该单位的废水、固体废物和废气进行检测。

## 二、单位概况

单位名称：鄱阳县绿色东方再生能源有限公司

单位地址：江西省

检测日期：2024年10月

检测单位：贝源检测有限公司

1000

the 1990s, the number of people in the world who are illiterate has increased from 1.1 billion to 1.5 billion. The number of illiterate people in the world is projected to reach 1.8 billion by the year 2015. The number of illiterate people in the world is projected to reach 2.1 billion by the year 2020. The number of illiterate people in the world is projected to reach 2.4 billion by the year 2025. The number of illiterate people in the world is projected to reach 2.7 billion by the year 2030. The number of illiterate people in the world is projected to reach 3.0 billion by the year 2035. The number of illiterate people in the world is projected to reach 3.3 billion by the year 2040. The number of illiterate people in the world is projected to reach 3.6 billion by the year 2045. The number of illiterate people in the world is projected to reach 3.9 billion by the year 2050. The number of illiterate people in the world is projected to reach 4.2 billion by the year 2055. The number of illiterate people in the world is projected to reach 4.5 billion by the year 2060. The number of illiterate people in the world is projected to reach 4.8 billion by the year 2065. The number of illiterate people in the world is projected to reach 5.1 billion by the year 2070. The number of illiterate people in the world is projected to reach 5.4 billion by the year 2075. The number of illiterate people in the world is projected to reach 5.7 billion by the year 2080. The number of illiterate people in the world is projected to reach 6.0 billion by the year 2085. The number of illiterate people in the world is projected to reach 6.3 billion by the year 2090. The number of illiterate people in the world is projected to reach 6.6 billion by the year 2095. The number of illiterate people in the world is projected to reach 6.9 billion by the year 2100.

The figure consists of three bar charts, each representing a different category of respondents. The first chart shows the percentage of respondents for 'All respondents', the second for 'Non-respondents', and the third for 'Respondents'. The y-axis for all charts ranges from 0 to 100. The x-axis for all charts shows the percentage of respondents for each category.

| Category        | Percentage of Respondents |
|-----------------|---------------------------|
| All respondents | 100%                      |
| Non-respondents | 100%                      |
| Respondents     | 100%                      |

**Abstract**
